

# SeeLevel Blue™ Pro

**Required exterior ancillary equipment on all fire water tanks under National Fire Protection Association (NFPA-22) Standards.**

The SeeLevel Blue™ Pro liquid level indicator is made in the United States. It is designed for low pressure, atmospheric tank installations and is not an inverted scale as most competitors are.

- Suitable for all storage tanks and can exceed 120+ feet tall
- Roof pulley trolley: Powder coated with galvanized interior dual pulleys
- Storyboard: Powder coated carbon steel; 5 1/4in. wide, 1/4in. thick; UV resistant decal/scale in metric or imperial with powder coated mounting brackets; all hardware may not be included for every installation process
- Internal Pulley: Stainless steel 316
- Indicator: Powder coated carbon steel.
- Float wire: Stainless steel 316; Internal guide wire for float for optimum accuracy
- Float: PE, 8" and, also available in stainless steel upon request
